It provides priceless information not only on what constitutes successful leadership but also illuminates why leadership falters.

Based primarily upon research, this book assembles leadership lessons from more than 100 biographies and autobiographies of a diverse group of leaders, including individuals from the worlds of science, economics, business, and human rights, and also includes thought on leadership derived from of many other individuals representing both leaders and those who follow the leaders. As a result, the author presents not only a clear "how-to" guidebook for those wishing to lead, but also a comprehensive, multifaceted examination of leadership from several relevant perspectives.
