The 2nd Warning (Why? Book 1) BURSTONE ENTERPRISES

"Why?" Is the author's answer to Douglas Adams question: "Life, the Universe and Everything?" What is life all about, why are we here, what function does the Universe perform, who created it or was it all a pure, by chance, accident?

If it wasn't an accident is there a God? Who is that God, where is that God, is that God an omnipotent being or just a more advanced alien race or a combination of both? If there is a guiding intelligence to the Universe what on Earth was it thinking when it created us: "What could possibly go wrong?"

Why don't we see or hear much from God these days, was there a change of address we missed; has the phone been disconnected? Does that worthy even live in this universe any more or have the Gods moved outside of the universe they created?

These books will tie together a lot of theories in one simple package: Are there aliens out there; are there little grey aliens with big black eyes? Why don't they talk to us? Surely someone can go faster than light and visit us? What are ghosts, spectres, spirits, and poltergeists? Does evil exist? What is life, is it merely another form of energy holding up a corporeal shell? Have aliens visited us on Earth before; if so how often and why? Did they leave or take something?

The answers start with volume one: "The 2nd Warning."

The setting begins now: The human population is exploding, finite resources are dwindling and scientific resources are focused upon creating deep space escape vehicles for the few who can afford them. Those among the human population able to claim intelligence are pondering: "Life, the Universe and Everything!" What does it mean?

Our heroin is Dr. Anne Kimberley-Adams PhD. an English born scientist, married to an American who is busy working in her home lab in BC Canada developing something extraordinary. She is watched from near and far; very far! The technology she is developing is better than anything else in the known universe and certain aliens want to get a hold of it!

Unfortunately: Stealing it is illegal in our galaxy because the Galactic Council rules say so. But if Earth joined the GC things would be different! The problem with that possibility is this: Is humanity smart enough to do what it takes to join the GC and put an end to all of its challenges?

The whole problem is unceremoniously dumped into the lap of the GC's most senior civil servant in Earth's galaxy: Fenwycke Zendooble. He knows the Earth well; he's been visiting it for centuries!

Can he recruit humanity; does he really want to?

Vol 1: The 2nd Warning - 603 letter size pages, 281.6k words, 1.595m characters.
