## Pseudo-Differential Operators, Generalized Functions and Asymptotics

This volume consists of twenty peer-reviewed papers from the special session on pseudodifferential operators and the special session on generalized functions and asymptotics at the Eighth Congress of ISAAC held at the Peoples' Friendship University of Russia in Moscow on August 22-27, 2011. The category of papers on pseudo-differential operators contains such topics as elliptic operators assigned to diffeomorphisms of smooth manifolds, analysis on singular manifolds with edges, heat kernels and Green functions of sub-Laplacians on the Heisenberg group and Lie groups with more complexities than but closely related to the Heisenberg group,  $L_p$ -boundedness of pseudo-differential operators on the torus, and pseudo-differential operators related to time-frequency analysis. The second group of papers contains various classes of distributions and algebras of generalized functions with applications in linear and nonlinear differential equations, initial value problems and boundary value problems, stochastic and Malliavin-type differential equations. This second group of papers are related to the third collection of papers via the setting of Colombeau-type spaces and algebras in which microlocal analysis is developed by means of techniques in asymptotics. The volume contains the synergies of the three areas treated and is a useful complement to volumes 155, 164, 172, 189, 205 and 213 published in the same series in, respectively, 2004, 2006, 2007, 2009, 2010 and 2011.

### **From reader reviews:**

#### **Celia Redmond:**

Have you spare time for just a day? What do you do when you have considerably more or little spare time? Sure, you can choose the suitable activity regarding spend your time. Any person spent their very own spare time to take a stroll, shopping, or went to the particular Mall. How about open or even read a book eligible Pseudo-Differential Operators, Generalized Functions and Asymptotics? Maybe it is for being best activity for you. You know beside you can spend your time using your favorite's book, you can wiser than before. Do you agree with its opinion or you have some other opinion?

#### **Nancy Sobel:**

As people who live in typically the modest era should be change about what going on or details even knowledge to make these people keep up with the era that is certainly always change and make progress. Some of you maybe can update themselves by looking at books. It is a good choice for you but the problems coming to you is you don't know what one you should start with. This Pseudo-Differential Operators, Generalized Functions and Asymptotics is our recommendation to cause you to keep up with the world. Why, because book serves what you want and wish in this era.

#### **Aaron Eldred:**

The actual book Pseudo-Differential Operators, Generalized Functions and Asymptotics has a lot details on it. So when you read this book you can get a lot of profit. The book was written by the very famous author. This articles author makes some research ahead of write this book. That book very easy to read you will get the point easily after reading this book.

#### **Joan Munoz:**

This Pseudo-Differential Operators, Generalized Functions and Asymptotics is great e-book for you because the content which can be full of information for you who also always deal with world and get to make decision every minute. This specific book reveal it facts accurately using great arrange word or we can point out no rambling sentences included. So if you are read that hurriedly you can have whole data in it. Doesn't mean it only will give you straight forward sentences but hard core information with splendid delivering sentences. Having Pseudo-Differential Operators, Generalized Functions and Asymptotics in your hand like getting the world in your arm, information in it is not ridiculous 1. We can say that no guide that offer you world with ten or fifteen minute right but this reserve already do that. So , this is good reading book. Hi Mr. and Mrs. busy do you still doubt in which?
