Hans Petter Langtangen

A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering)

Hans Petter Langtangen

The book serves as a first introduction to computer programming of scientific applications, using the high-level Python language. The exposition is example- and problem-oriented, where the applications are taken from mathematics, numerical calculus, statistics, physics, biology, and finance. The book teaches "Matlab-style" and procedural programming as well as object-oriented programming. High school mathematics is a required background, and it is advantageous to study classical and numerical one-variable calculus in parallel with reading this book. Besides learning how to program computers, the reader will also learn how to solve mathematical problems, arising in various branches of science and engineering, with the aid of numerical methods and programming. By blending programming, mathematics and scientific applications, the book lays a solid foundation for practicing computational science.

From reader reviews:

Gracie Thomas:

This A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering) book is not ordinary book, you have after that it the world is in your hands. The benefit you receive by reading this book is usually information inside this guide incredible fresh, you will get details which is getting deeper an individual read a lot of information you will get. This kind of A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering) without we realize teach the one who looking at it become critical in thinking and analyzing. Don't possibly be worry A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering) can bring any time you are and not make your tote space or bookshelves' grow to be full because you can have it in your lovely laptop even phone. This A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering) having good arrangement in word along with layout, so you will not feel uninterested in reading.

Helen McCormick:

As we know that book is essential thing to add our understanding for everything. By a book we can know everything we want. A book is a set of written, printed, illustrated or maybe blank sheet. Every year has been exactly added. This reserve A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering) was filled regarding science. Spend your extra time to add your knowledge about your research competence. Some people has diverse feel when they reading any book. If you know how big benefit from a book, you can feel enjoy to read a reserve. In the modern era like right now, many ways to get book that you just wanted.

Michael Farrell:

A lot of reserve has printed but it differs. You can get it by net on social media. You can choose the very best book for you, science, witty, novel, or whatever by means of searching from it. It is referred to as of book A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering). You can include your knowledge by it. Without leaving behind the printed book, it may add your knowledge and make anyone happier to read. It is most important that, you must aware about book. It can bring you from one destination for a other place.

Maria Levine:

What is your hobby? Have you heard that will question when you got students? We believe that that issue was given by teacher on their students. Many kinds of hobby, Every person has different hobby. And you also know that little person like reading or as studying become their hobby. You should know that reading is very important in addition to book as to be the point. Book is important thing to include you knowledge, except your personal teacher or lecturer. You see good news or update about something by book. Amount

types of books that can you decide to try be your object. One of them is actually A Primer on Scientific Programming with Python (Texts in Computational Science and Engineering).
