Concrete Structures for Wind Turbines (Beton-Kalender Series)

Jürgen Grünberg, Joachim Göhlmann

Concrete Structures for Wind Turbines (Beton-Kalender Series) Jürgen Grünberg, Joachim Göhlmann

The wind energy industry in Germany has an excellent global standing when it comes to the development and construction of wind turbines. Germany currently represents the world's largest market for wind energy. The ongoing development of ever more powerful wind turbines plus additional requirements for the design and construction of their offshore foundation structures exceeds the actual experiences gained so far in the various disciplines concerned.

This book gives a comprehensive overview for planning and structural design analysis of reinforced concrete and pre-stressed concrete wind turbine towers for both, onshore and offshore wind turbines. Wind turbines represent structures subjected to highly dynamic loading patterns. Therefore, for the design of loadbearing structures, fatigue effects - and not just maximum loads - are extremely important, in particular in the connections and joints of concrete and hybrid structures. There multi-axial stress conditions occur which so far are not covered by the design codes. The specific actions, the nonlinear behaviour and modeling for the structural analysis are explained. Design and verification with a focus on fatigue are addressed. The chapter Manufacturing includes hybrid structures, segmental construction of pre-stressed concrete towers and offshore wind turbine foundations.

Selected chapters from the German concrete yearbook are now being published in the new English "Beton-Kalender Series" for the benefit of an international audience.

Since it was founded in 1906, the Ernst & Sohn "Beton-Kalender" has been supporting developments in reinforced and prestressed concrete. The aim was to publish a yearbook to reflect progress in "ferro-concrete" structures until - as the book's first editor, Fritz von Emperger (1862-1942), expressed it - the "tempestuous development" in this form of construction came to an end. However, the "Beton-Kalender" quickly became the chosen work of reference for civil and structural engineers, and apart from the years 1945-1950 has been published annually ever since.

From reader reviews:

David Chambers:

Why don't make it to be your habit? Right now, try to prepare your time to do the important behave, like looking for your favorite guide and reading a reserve. Beside you can solve your condition; you can add your knowledge by the publication entitled Concrete Structures for Wind Turbines (Beton-Kalender Series). Try to make book Concrete Structures for Wind Turbines (Beton-Kalender Series) as your friend. It means that it can for being your friend when you feel alone and beside those of course make you smarter than before. Yeah, it is very fortunated to suit your needs. The book makes you considerably more confidence because you can know every thing by the book. So , we need to make new experience as well as knowledge with this book.

Joshua Mack:

What do you with regards to book? It is not important with you? Or just adding material when you want something to explain what yours problem? How about your spare time? Or are you busy particular person? If you don't have spare time to do others business, it is give you a sense of feeling bored faster. And you have time? What did you do? Everyone has many questions above. They should answer that question due to the fact just their can do that. It said that about reserve. Book is familiar in each person. Yes, it is correct. Because start from on pre-school until university need this Concrete Structures for Wind Turbines (Beton-Kalender Series) to read.

Denise Lee:

The knowledge that you get from Concrete Structures for Wind Turbines (Beton-Kalender Series) is a more deep you looking the information that hide inside words the more you get considering reading it. It does not mean that this book is hard to understand but Concrete Structures for Wind Turbines (Beton-Kalender Series) giving you enjoyment feeling of reading. The copy writer conveys their point in selected way that can be understood by anyone who read the item because the author of this reserve is well-known enough. This kind of book also makes your vocabulary increase well. It is therefore easy to understand then can go along, both in printed or e-book style are available. We highly recommend you for having this particular Concrete Structures for Wind Turbines (Beton-Kalender Series) instantly.

Loren Velasco:

Reading can called head hangout, why? Because when you are reading a book especially book entitled Concrete Structures for Wind Turbines (Beton-Kalender Series) your mind will drift away trough every dimension, wandering in every aspect that maybe unidentified for but surely can become your mind friends. Imaging every single word written in a guide then become one web form conclusion and explanation in which maybe you never get prior to. The Concrete Structures for Wind Turbines (Beton-Kalender Series) giving you one more experience more than blown away your head but also giving you useful details for your

better life on this era. So now let us explain to you the relaxing pattern here is your body and mind is going to be pleased when you are finished examining it, like winning an activity. Do you want to try this extraordinary shelling out spare time activity?
